

WEMC Members: Have Your Say

We are currently working to improve the experience of our members, including the look and feel of the members section of the WEMC website. Take our 60-second survey to give your thoughts on the kinds of features you would like to see us focus on over the next several months.

Energy & Meteorology Education SIG

We recently relaunched the Data Exchange, Access and Standards Special Interest Group (SIG), and we are now ready to follow up with the relaunch of the Energy & Meteorology Education SIG.

Current ideas and aims for the SIG are:

- To draw up a 'global syllabus' for the teaching and learning of

energy and meteorology education in formal education.

- Use research, knowledge and expertise to find common threads of learning around the globe.
- Research into the areas of need to enhance energy and meteorology education. What strengths do educators have that can be utilised to support areas of need?
- Be a conduit and connector for educators and experts to work together.
- To assist and advise in the development of meteorology/energy resources, applications and tools for educators at all levels.

SIG members collaborate remotely, gathering together at conferences and events where possible. If you are interested in being a part of the Education SIG, please do get in touch. There will be an Education SIG workshop at [ICEM2019](#) at DTU, Denmark in June.
