Exciting update from the WEMC team

This month we're featuring some very exciting news and events. We thought we'd share the update of the C3S Education Demonstrator tool, update on air pollution during COVID-19 and the upcoming SECLI-FIRM Stakeholder Workshop

Read below to find out the other things we've been up to...

C3S Edu Demo mobile compatibility is live

The [C3S Edu Demo](#) had a significant update and is **now compatible with mobile devices v1.5**. The aim of the C3S Edu Demo is to make robust scientific climate and energy data accessible to a wider audience, and a mobile-

Update on air pollution during COVID-19

After nearly four months since **COVID-19 restrictions** started in China, [global statistics about air quality](#), as measured by [Nitrogen Dioxide](#) (NO₂) and [Carbon Monoxide](#) (CO), show values still below the 2019 levels but there are

compatible version **will ensure even more people can benefit.**

indications they are starting to rebound in some areas.

Free Stakeholder Workshop on 15 June

Learn about the seasonal forecast, the decision making and the trial climate service services being developed by the **SECLI-FIRM project** for the energy and water industries. [Register for this free, online workshop.](#)

WEMC Member Blog: Elena Maksimovich

This months special guest blog is about [Weather insurance for farmers: what is it and when to buy?](#) We are delighted to share with you this opinion piece written by **Elena Maksimovich** a WEMC member from Weather Trade Net LLC.
